Veer Narmad South Gujarat University, India

## PROJECTS

### 1. PawPals

**GitHub Link :** <https://github.com/devMadlani/PawPals.git>

**Description :** PawPals is an all-in-one online platform for pet care needs. It offers adoption services, supports animal rescue efforts, helps locate trusted day care services, and provides access to reliable grooming professionals. PawPals is a community-driven hub where pet lovers can find everything they need to ensure the well-being of their furry friends.

### 2. newsMonkey

**GitHub Link :** <https://github.com/devMadlani/newsMonkey.git>

**Description:** newsMonkey is a simple and user-friendly application that provides the latest news. It also offers categories to view news according to your interests, ensuring you stay updated on the topics that matter most to you.

### 3. iNoteBook

**GitHub Link :** <https://github.com/devMadlani/iNoteook.git>

**Description:** iNotebook is a secure and user-friendly note-taking application designed to ensure that only authorized users can access their notes. Users can sign up or log in with their credentials and add, read, update, and delete their notes effortlessly.

### 4. textUtils

**GitHub Link :** <https://github.com/devMadlani/textUtils.git>

**Description:** textUtils is a handy application that allows you to convert your text to lower case, upper case, title case, camel case, and reverse. It also provides a summary of your text, including word count and character count. The application features a dark mode for a comfortable user experience in low-light environments.

### 5. Weather App

**GitHub Link :** <https://github.com/devMadlani/weatherapp.git>

**Description:** The Weather App is a user-friendly application that provides real-time weather information for any location worldwide.
